DETAILED ACTION

Claims 12-24 are pending. The Appeal Brief filed 2/2/04, has been received.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Chris Tsang on 6/9/04.

The application has been amended as follows:

1) In claim 12,

-in line 1, delete the term "for" and insert the term "of".

-part (b), delete the term "compound" and insert the term "agent".

2) In claim 17, replace the period with a comma and insert the phrase (following the comma), "whereas the absence of reduced cytochrome c in the mixture comprising the test agent indicates that the test agent sequesters AR-NOX."

3) In claim 20, replace the period with a comma, and insert the phrase (following the comma), "whereas the absence of reduced substrate in the mixture comprising the test agent indicates that the test agent sequesters AR-NOX."

4) In claim 24, replace the period with a comma, and insert the phrase (following the comma), "whereas the absence of disulfide-thiol interchange in the substrate in the mixture comprising the test agent indicates that the test agent sequesters AR-NOX."

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 12-24 are allowable over the prior art, as the prior art neither anticipates nor renders obvious the instant methods of screening for agents that sequester AR-NOX. The closest prior art is BioFactors, 1999, 9:179-187. However, a 131 Declaration filed 3/14/02, established that BioFactors is not prior art, as it is not "by another".

Applicant's arguments toward the 35 USC 112, 1st paragraph, rejection are persuasive to overcome this rejection in the previous Office Action. See the Appeal Brief filed 2/2/04, for these arguments. It is further pointed out that the specification does teach test agents and that in the screening assay art, test agents are well known. Furthermore, AR-NOX is an isoform of NADH oxidase, wherein agents that react with NADH oxidase are well known. Thus, the instant claims are enabled.

The above Examiner's amendment clarifies the instant claims by reciting the link between detection and indication of a test agent that sequesters AR-NOX.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

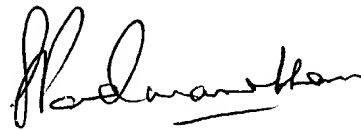

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lauren Q Wells whose telephone number is 571-272-0634. The examiner can normally be reached on M&R (5:30-4).
